SRC Electronic

Server/Handheld PDA

PDA 002S

Handheld PDA

Functions

Data collection using the wireless interface.

Items localization using the GPS module embedded.

Stored data transmission to a central server using the 3G/4G integrated module.

It can be used as a central server and collect the data transmitted by the concentrator, whenever it is located, thanks to the integrated GSM/GPRS module.

The data are converted directly into Excel and be processed eventually by any other data base.

Windows 10 operating system.

Useful tool for the system installation and maintenance thanks to the two cameras and the objects identification system (optional).

Technical Specifications

CPU	Intel Quad-core turbo 1.8Ghz
OS	Windows 10
Display	8″(1280x800)
2 Cameras	2.0 M e 5.0M
Memory	2G RAM, 64G SSD
WIFI	802.11/B/G/N
